

KLOVE is heard on 94.7, 94.9, and 105.3 in my area. My family and I enjoy such a station. (we are a black family that have been moved by this white based station). It really does bring families closer when all enjoy the same music. If a LPFM is allowed to interrupt the KLOVE signal, we could be listening to beneficial music and then suddenly listening to something vulgar and improper. It is in the best interest that people like me have this calming, positive, and encouraging alternative.
